

PATENTS

Patents (*Granted*)

Allen, J. D. Jr., N. G. Ivezic, M. Ludtka, and T. Zacharia, "Method and Apparatus for Solving Complex and Computationally Intensive Inverse Problems in Real-Time," *U.S. Patent No. 6,208,982* (March 27, 2001).

Fijany, A., J. Barhen, and N. Toomarian, "Signal Processing Applications of Massively Parallel Charge-Domain Computing Devices: Part II," *U.S. Patent No. 5,952,685* (September 14, 1999).

Hively, L. M. et al., "Epileptic Seizure Prediction by Nonlinear Methods," *U.S. Patent No. 5,857,978*, January 12, 1999.

Kulesz, James J., "Gauge for Measuring Ultra-low Gas Pressures," *U.S. Patent No. 3,744,318*.

Liu, Y. and P. Davis, "Adaptive Wavelength Selection Laser System," *Japan Patent No. 3073945* (June 2000).

Liu, Y., P. Davis, and N. Egami, "Measurement of Optical Reflections in Semiconductor Lasers," *Japan Patent No. 3081569* (June 2000).

Liu Y. and P. Davis, "Communication Systems using Chaotic Signal Generators," *Japan Patent No. 2960406* (July 1999).

Reister, D. B. and J. Barhen, "Method for Using Global Optimization to the Estimation of Surface-Consistent Residual Statics," *U.S. Patent No. 6,188,964* (February 13, 2001).

Toomarian, N. and J. Barhen, "Neural Networks Training by Integration of an Adjoint System of Equations Forward in Time," *U.S. Patent No. 5,930,781* (July 27, 1999).

Zacharia, T., J. D. Allen, Jr., and J. G. Schroth, "Neural Network Control of Spot Welding," *U.S. Patent No. 6,018,729* (January 25, 2000).

Patents (*Pending*)

Allgood, G. O., W. W. Manges, and S. Smith, "Software Selectable Sensor Array," October 2001.

Braiman, Y. and Y. Liu, "Laser Array Synchronization," *U.S. Patent Application No. 09/999,187* (November 30, 2001).

Fischer, I., Y. Liu, and P. Davis, "Noise Reduction, Optical Data Transmission, Optical Signal Pick-Up Systems Using Optical Injection," *Japan Patent* (submitted in September 1999).

Hively, L. M., P. C. Gailey, and V. A. Protopopescu, "Improved Condition Assessment of Nonlinear Processes," U.S. Patent application filed March 7, 2000.

Liu, Y., P. Davis, and T. Aida, "High-Frequency Signal Generation in Semiconductor Laser Using Injection Locking," *Japan Patent* (submitted in December 2000).

Liu, Y., P. Davis, and T. Aida, "Multichannel Aata Transmission Systems Using Mode Hopping Laser," *Japan Patent* (submitted in March 2000).

Potok, T. E., "Method for Distributed Agent-based Non-expert Simulation of Manufacturing Process Behavior," files as docket 6321-147, September 20, 2000.

Potok, T. E., "Methods for Automatically Evaluating a Transition from a Batch Manufacturing Technique to a Lean Manufacturing Technique," filed as docket 6321-148, September 20, 2000.

Rao, N. S. V, S. G. Batsell, and J. Jonassaint, "Intelligent Routing for Dynamic Wireless Networks," *U.S. Patent*, (submitted in September 2000).

Welch, D. E., L. M. Hively, and R. F. Holdaway, "Nonlinear Prediction of Fatigue Failure," U.S. Patent Application, Lockheed Martin Energy Research Corporation, (filed September 15, 1999).

Inventions (*Disclosures*)

Allgood, G. O., "Coherent Frequency-Modulated Continuous Wave Lidar for Automated Debriding," ERID 0677, S-92,532, elected 1999.

Hively, L. M., "Further Improvements in Condition Assessment of Nonlinear Processes," Lockheed Martin Energy Research Corporation, invention disclosure, ID0885, October 17, 2000.

Hively, L. M., P. C. Gailey, and V. A. Protopopescu, "Improvements in Condition Assessment of Nonlinear Processes," ERID #0694, Lockheed Martin Energy Research Corporation, Invention Disclosure, March 24, 1999.

Rao, N. S. V., S. G. Batsell, and J. Jonassaint, "Connectivity-Through-Time Protocol for Dynamic Wireless Networks," Department of Energy Invention Disclosure, ID 0893, S-96, 637,2000.

Welch, D. E., L. M. Hively, and R. F. Holdaway, "Improvements to Nonlinear Prediction of Fatigue Failure," ERID-0652, Lockheed Martin Energy Research Corporation, Invention Disclosure (elected January 19, 1999).
