Curriculum Vitae: **Christopher G. Baker**

email: bakercg **at** ornl.gov **address:** Oak Ridge National Laboratory
mobile: 865.272.9767   Computational Engineering and Energy Studies
website: http://www.csm.ornl.gov/∼cbaker   PO Box 2008 MS6003
Oak Ridge, TN 37831-6003

Research Interests

Numerical optimization on Riemannian manifolds, Iterative solvers for large-scale eigenvalue and singular value problems, Large-scale scientific computing, Scientific computing via modern programming paradigms, High-performance computing, Emerging HPC architectures, HPC in nuclear engineering.

Education

THE FLORIDA STATE UNIVERSITY   Tallahassee, FL
Ph.D., Computational Science, August 2008.
Advisors: Kyle A. Gallivan and Pierre-Antoine Absil
"Riemannian Manifold Trust-Region Methods with Applications to Eigenproblems"

M.S., Computer Science, August 2004. Advisor: Kyle A. Gallivan
"A Block Incremental Algorithm for Computing Dominant Singular Subspaces"

B.S. (with high honors), April 2002.
Double major: Pure Mathematics and Computer Science

Employment History

OAK RIDGE NATIONAL LABORATORY   Oak Ridge, TN
Computational Engineering and Energy Studies Group,
Computer Science and Mathematics Division
R&D Staff (January 2012 – present)
R&D Associate (October 2009 – January 2012)

SANDIA NATIONAL LABORATORIES   Albuquerque, NM
Scalable Algorithms Department
Postdoctoral Researcher (June 2008 – September 2009)

SANDIA NATIONAL LABORATORIES   Albuquerque, NM
Applied Mathematics Department
Year-round Graduate Student Intern (May 2005 – May 2008)

FLORIDA STATE UNIVERSITY   Tallahassee, FL
School of Computational Science
Graduate Research Assistant (May 2002 – Dec 2006)

FLORIDA STATE UNIVERSITY   Tallahassee, FL
Undergrad Research Assistant, Computational Science (May 2001 – May 2002)
Undergrad Research Assistant, Neuroscience (May 1999 – September 2001)

Current Research Activities

- High-performance scientific programming and parallel programmming models: the Tpetra distributed, high-performance linear algebra library for multi-precision computing; the Kokkos parallel node programming interface and collection of SMP-aware linear algebra objects; and the Anasazi package for high-performance parallel eigensolvers. With M. Heroux, R. Lehoucq, H. Thornquist, M. Hoemmen and A. Williams.

- Large-scale optimization on Riemannian manifolds with applications. With K. Gallivan, P.-A. Absil and P. Van Dooren.

- Incremental methods for large scale subspace tracking. With K. Gallivan, P. Van Dooren, L. Mathelin and M. Shah.

- Scalable solvers for embedded uncertainty quantification. With C. Webster and M. Stoyanov.

Awards

Best paper, ANS Winter Meeting 2010, Mathematics and Computation Division
Student travel grant to 2008 Copper Mountain Conference on Iterative Methods
ACM Southeast Regional Programming Contest, 5th Place (2001)
Harris Undergraduate Scholarship (2001)
Florida State University Scholarship (1998)
Florida Bright Futures Academic Top Scholar Award (1998)
Florida Bright Futures Scholarship (1998)

Professional and Honor Society Memberships

2004 - present: Society for Industrial and Applied Mathematics (SIAM)
2004 - present: Association for Computing Machinery (ACM)
2002: Phi Beta Kappa
2002: Upsilon Pi Epsilon
2002: Pi Mu Epsilon

Organized Minisymposiums

- "Modern libraries and methods for eigenvalue and singular value problems", for SIAM CSE 2013, Boston, MA.
- "Recent Algorithms and Applications for the Truncated Singular Value Decomposition" (with M. Shah), for SIAM Annual Meeting 2013, San Diego, CA.

Peer Review

- Linear Algebra and its Applications ○ SIAM Journal on Matrix Analysis and Applications ○ SIAM Journal on Scientific Computing ○ Parallel Computing ○ Journal of Computational and Applied Mathematics ○ ACM Transactions on Mathematical Software ○ Mathematical Programming ○ BIT Numerical Mathematics ○ Computational Optimization and Applications ○ Numerical Functional Analysis and Optimization ○ Applied Mathematics and Computation
- American Control Conference ○ IEEE Transactions on Automatic Control ○ IEEE Conference on Decision and Control ○ International Conference on Supercomputing ○ International Conference for High Performance Computing, Networking, Storage, and Analysis (Super-Computing)

Program Committees
- SuperComputing 2013, Technical papers committee, Applications area
- IEEE Cluster 2011, Program committee, Workshop on Parallel Programming on Accelerator Clusters

Civic and Other Activities
- Judge, Capital Regional Science & Engineering Fair: 2005–2006
- Judge/Problem Writer, FSU Programming Contest: 2003–2005
- Member, Executive Council, ACM (FSU Chapter), 2005–2006
- Chair, ACM (FSU Chapter), 2001–2002, 2003–2005
- Secretary, ACM (FSU Chapter), 2002–2003

Research Proposals and Grants: PI/Co-PI
- "A Novel Uncertainty Quantification Paradigm for Enabling Scalable Predictive Science"
PI: C. G. Webster, Co-PI: C. G. Baker.
Laboratory Directed Research And Development (LDRD), ORNL.
October 2012 – September 2014.
- "eXascale PRogramming Environment and System Software (XPRESS)"
Coordinating PI: R. Brightwell (Sandia), ORNL PI: C. G. Baker.
DOE ASCR X-Stack 2012 (LAB 12-619).
September 2013 – August 2015.

- P.-A. Absil, C. G. Baker and K. A. Gallivan. *Trust-region Methods on Riemannian Manifolds with Applications in Numerical Linear Algebra.* Proceedings of the Sixteenth International Symposium on Mathematical Theory of Networks and Systems (MTNS). Katholieke Universiteit Leuven, Belgium, July 2004.

Invited Talks and Presentations

- *High Performance Computing (HPC) At All Scales: Implementation of Numerical Algorithms on Heterogeneous Hardware Ranging from Laptops to Supercomputers.* Panel participant. American Nuclear Society Winter Meeting 2012, San Diego, CA. November 2012.

- *An Overview of Trilinos: Scalability in project management and performance.* Keynote presentation. European Seminar on Computing (ESCO 2012), Pilsen, Czech Republic. June 2012.

- *R&D in Trilinos for Emerging Parallel System.* Invited talk and panel. Accelerating Computational Science Symposium 2012, Washington, D.C. March 2012.

- *Incorporating Trilinos Data Classes Into An Application* Workshop presentation. 2011 Trilinos User Group Meeting, Sandia National Labs. November 2011.

- *Parallel Programming with Tpetra and Kokkos.* Workshop presentation. 2010 Trilinos User Group Meeting, Sandia National Labs. November 2010.

- *Trilinos for Emerging Parallel Computing Systems.* Invited talk. 39th SPEEDUP Workshop on High-Performance Computing, ETH Zurich, Switzerland. September 2010.

- *Engineering a Large-Scale Library: Trilinos.* Invited talk. 2010 CScADS Autotuning and Libraries Workshop, Snowbird, UT. August 2010.

- *Migrating the Epetra to Tpetra and a Kokkos Tutorial.* Workshop presentation. 2010 Trilinos Spring Developer Meeting, Sandia National Labs. May 2009.

- *Pedal to the Metal: Experiences Programming Accelerators for HPC.* Presentor and panel participant. The 11th LCI International Conference on High-Performance Clustered Computing, Pittsburgh, PA, March 2010.

- *Teuchos Memory Management Tools: A User Perspective.* Workshop presentation. 2009 Trilinos User Group Meeting, Sandia National Labs. November 2009.

- *Introducing Tpetra and Kokkos.* Workshop presentation. 2009 Trilinos User Group Meeting, Sandia National Labs. November 2009.

- *An Abstract Node API for Heterogeneous and Multi-core Computing.* Invited talk, Los Alamos Computer Science Symposium (LACSS) 2008, Santa Fe, NM. October 2008.

- *Problem and Solutions in Optimization on Manifolds.* Invited talk, 2008 CSRI Summer Seminar, Sandia National Laboratories. June 2008.

- *Manifold Trust-Region Methods with Applications to Eigenproblems.* Poster presentation, SCS Computational Xposition 2006, School of Computational Science, Florida State University.

- *An Overview of Anasazi.* Workshop presentation. 2005 Trilinos User Group Meeting, Sandia National Labs. October 2005.

- *A Block Incremental Algorithm for Computing Dominant Singular Subspaces.* Poster presentation, SCS Computational Xposition 2004, School of Computational Science, Florida State University.

Conference Talks (refereed abstracts)

- C. G. Baker. *An Incremental SVD for Feature Extraction from Fluid Flow.* Refereed abstract in mini-symposium "Recent Algorithms and Applications for the Truncated Singular Value Decomposition." SIAM Annual 2013, San Diego, CA, July 2013.

- C. G. Baker. *Streaming Singular Value Computations on GPU Platforms.* Refereed abstract in mini-symposium "Algorithms, Libraries and Frameworks for Scalable Manycore Computations." SIAM Annual 2013, San Diego, CA, July 2013.

- C. G. Baker. *Fast and reliable trust-region eigensolvers.* Refereed abstract in mini-symposium "Modern libraries and methods for eigenvalue and singular value problems." SIAM CSE 2013, Boston, MA, February 2013.

- C. G. Baker. *Multi-precision inner/outer solvers via generic programming libraries.* Refereed abstract in mini-symposium "Programming Paradigms, Algorithms and Frameworks for High Performance Scalable Manycore Systems." SIAM Annual Meeting 2012, Minneapolis, MN, July 2012.

- C. G. Baker, K. A. Gallivan, P. Van Dooren. *Incremental Methods for Computing Extreme Singular Subspaces.* SIAM Conference of Applied Linear Algebra 2012, Valencia, Spain, June 2012.

- C. G. Baker. *Gradually Transitioning Library users to the Hybrid-parallel Paradigm.* Refereed abstract in mini-symposium "Creating the Next Generation of High Performance Numerical Computing Capabilities." International Congress on Industrial and Applied Mathematics (ICIAM) 2011, Vancouver, CA, July 2011.

- C. G. Baker. *Engineering a Kernel-agnostic Distributed Linear Algebra Library for Multi/many-core in Trilinos.* Refereed abstract in mini-symposium "Parallel Programming Models and Algorithms for Scalable Manycore Systems." SIAM Conference on Computational Science and Engineering 2011, Reno, NV, March 2011.

- C. G. Baker and M. A. Heroux. *Developing Large-Scale Scientific Software For Generic Multi-core Nodes.* Refereed abstract in mini-symposium "Parallel Programming Models and Algorithms for Multicore Clusters and GPGPUs." SIAM Conference on Parallel Processing 2010, Seattle, WA, Feb 2010.

- C. G. Baker, H. C. Edwards, M. A. Heroux and A. B. Williams. *An Abstract Model for Programming Multi-core Nodes.* Mini-symposium on "Supercomputing Challenges: Petascale and Beyond." SIAM Annual Meeting 2009, Denver, CO, July 2009.

- G. M. Reese, T. F. Walsh, C. G. Baker and A. Ames. *Numerical Approaches for the Quadratic Eigenvalue Problem on Large Structural Acoustic Systems.* 10th US National Congress on Computational Mechanics, Columbus, OH, July 2009.
